WILLETT AND GRAY'S WEEKLY REPORT ON SUGAR CONDITIONS

STATISTICS BY SPECIAL CABLES.—Cuba.—The six principal ports: Receipts, 12,000 tons; exports, 58,000; stock, 538,000 tons, against 578,000 tons last year.

Centrals grinding 19, against 28 last week, 29 last year and 25 in 1912. Entire island receipts for week, 30,000 tons, against 38,000 tons last week, 34,000 tons last year and 29,000 tons in 1912.

Stocks in the United States and Cuba together of 1,004,725 tons, against 1,029,754 tons last week and 1,049,474 tons last year, a decrease of 44,749 tons from last year.

Europe—Stock in Europe 2,226,000 tons, against 2,105,000 tons last year.

VISIBLE SUPPLY.—Total stock of Europe and America, 2,230,725 tons against 2,154,474 tons last year at the same uneven dates. The increase of stock is 76,251 tons, against an increase of 64,123 tons last year. Total stocks and floats together show a visible supply of 3,450,725 tons against 3,390,474 tons last year, or an increase of 60,251 tons.

RAWS.—The market closed last Thursday with Centrifugals at 3.32c per lb., duty paid. On Friday the quotation rose to 3.35c, remained the same Saturday, rose to 3.45c Monday and Tuesday, returning on Wednesday to 3.35c per lb., 95 degrees test, which is the closing quotation.

The movement of prices shows that the market has been advancing during most of the week, having only a reasonable reaction near the close.

On the first advance to 3.35c basis some 30,000 bags Cubas and Porto Ricans were taken, mostly by the Arubuck refinery, for prompt June and July shipments, at 2.95c c. & f. (3.35c) for 96 degrees test basis.

The amount of premium shipment sugar placed at the high point was 10,000 bags Cubas to the Arubuck refinery at 2.75c c. & f. (3.45c) per lb.

The buying at the late reaction was good, some 200,000 bags being taken by the American.

Operators also paid 2.75c c. & f. (3.45c) for second half July shipment. The Canadian market has shown a buying interest in Demeraras and other West India sugar suited to that market, say to extent of 10,000 tons reported, at 2.35c to 2.37½c per lb. c. & f. Montreal.

The regular weekly cable from Cuba gives island receipts 30,000

developments, much depending on the firmness to be shown by holders.

In spite of many rumors to the contrary, there has been no decision rendered by the United States supreme court in regard to the Louisiana contention that Cuba sugars are not entitled to 20 per cent reduction from the Underwood-Simmons' tariff bill rate of duty of 1.25c on 96 test.

Private advices from Washington state that the above decision will undoubtedly come out on next Monday, as it is understood the supreme court adjourns on that date until next October.

CUBA CROP.—Havana, June 12, 1914.—The second half of the month of May was abundant in rains, forcing some centrals to prematurely end their crop.

The information received in those days from various sources caused us to make a recount of the sugars to be received (allowing for normal weather in the eastern provinces), giving as a result that our appreciation of the crop had to be reduced to 2,508,000 tons approximately.

So far the month of June is dry in various localities, especially in Calabaris and Sagua, and the seven centrals still in activity there have taken advantage of the favorable conditions, but as the rendiment daily becomes poorer and the workmen scarcer, their production will hardly affect the ultimate result of the crop.

In the eastern provinces fifteen centrals are still grinding, of which one-half are about ready to stop. The rest will probably continue in activity for a couple of months, and in accordance with the favorable or unfavorable weather conditions, may vary the total of the production from 8000 to 10,000 tons more or less.

The general aspect of the fields is good, but it is necessary that the rains should again become general in order that the canes may develop.

JAVA QUOTATIONS.—(By Cable).—June 18, 1914 and June 11, 1911—95 degrees test Raws, July-August, f. o. b. Java, 98. 4½ d.—98. 3d. per cwt. equal landed New York, duty paid, 3.52c—3.58c per lb. Before the Andean upheaval

The question which confronts the archaeologist is, how could a population sufficiently numerous to accomplish the building of such a city as Tiwanacu, in Bolivia, have maintained itself in this region? The ruins are located 13,000 feet above the level of the sea on a vast plateau where the constant cold prevents the maturing of corn or other grain. At present potatoes, oca and some other edible roots are grown, but the region sustains only a scanty mountain population. The city once covered a large area, the great structures were built by skilled masons. One stone is 36 feet long by seven feet wide and weighs 170 tons, another is 26 feet by sixteen, and six feet thick. Only the monoliths of ancient Egypt equal those found in Tiwanacu. The movement and placing of such monoliths point to a dense population, to an organized government, and consequently to a large agricultural area with means of transportation from various directions.

The only tenable explanation is

AD MEN'S CONVENTION CLOSING WITH "ALOHA"

[By Latest Mail] TORONTO, Ont.—With a circle of orange colored paper, symbolic of an ancient Hawaiian emblem of high regard and friendship, twined about them and the words of the romantic song "Aloha" ringing in their ears, the delegates to the tenth annual convention of the Associated Ad Clubs of the World brought their business to a close.

A great tribute was paid to William Woodhead of San Francisco, who was unanimously re-elected president, an added feature being the presentation to Woodhead by Mrs. Hocken, wife of the Mayor of Toronto, of an ebony gavel.

Liberality. "And will you give us your blessing?" pleaded the newly married ones of her father.

"Sure things," grunted the old man; "but the board will be at the usual rates."—Pennsylvania Punch Bowl.
